Dear Reader:

The Division of Aging is pleased to present the current Missouri Care Options Annual Report. Material in this report covers the activities during Fiscal Year 1999 (July 1, 1998 through June 30, 1999).

Information about services provided in the areas of long-term care screenings, screening outcomes, costs, and costs avoided are included in this report. We hope the data presented here will be useful to those who are interested in the Care Options program and services. These services are accessed through the Division of Aging and the Area Agencies on Aging for eligible adults of Missouri needing long-term care.

Any questions about the report should be directed to the Division of Aging (573/751-3082) or the Research and Evaluation Unit (573/751-3060), both located within the Department of Social Services.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard C. Dunn".

Introduction

The Missouri Care Options (MCO) program provides information to Missouri citizens about making choices regarding the variety of care options available to them when they may need long-term care. The program was implemented by the Department of Social Services/Division of Aging in 1993 as the result of a legislative initiative intended to inform individuals of all available long-term care options; promote quality long-term care in a home or community setting; moderate the growth of state funded nursing facility placements by assessing the viability of state funded care in a home or community setting; and enhance the integrity, independence and safety of Missouri's older adults.

MCO offers home and community long-term care services to adults, 18 years and older, who are Medicaid eligible, or potentially eligible, and in need of assistance. MCO also offers individuals who reside in long-term care facilities the option of home and community long-term care services if they qualify for care in a more independent setting. The in-home services available include:

- help with activities of daily living such as grooming, bathing, dressing, eating;
- help with complex physical needs;
- a companion to relieve family caregivers, giving them time to run errands or attend to personal needs;
- help with housekeeping, laundry, meal preparation, shopping and other services;
- in-home nursing care;
- supervised adult day care programs; and
- well prepared, nutritious meals delivered to the home through arrangements with the Area Agencies on Aging.

Screenings are required for persons entering nursing facilities who are Medicaid or potentially Medicaid eligible. The Central Registry Unit (toll-free hotline 1-800-392-0210), operated by the Division of Aging, is the clearinghouse for receipt of screening referrals. Upon completion of the screening process, an individual is determined to be MCO eligible if the individual:

- is considering state funded long-term care;
- has low-level maintenance health care needs but is "medically eligible" for nursing facility care;
- could reasonably have care needs met outside a nursing facility; and
- receives Medicaid funded long-term care in a home or community setting.

The purpose of this report is to present a summary of the MCO referral and screening process and various facts related to providing long-term care to MCO participants during fiscal year 1999.

Costs of Providing Services to MCO Clients at Home or in an RCF

The cost to provide in-home services (see Appendix, page 20) and home-delivered meals to almost 19,000 MCO clients totaled \$84.4 million in fiscal year 1999. Of that total, over half of the costs were state funded.

Costs of Providing MCO In-Home & RCF-PC Services					
	<u>State General Revenue</u>	<u>Percent of Total</u>	<u>Federal</u>	<u>Percent of Total</u>	<u>Total</u>
FY 1994	\$2,521,788	52%	\$2,304,203	48%	\$4,825,991

FY 1999	\$43,971,948	52%	\$40,413,320	48%	\$84,385,268

Note: General Revenue costs include cash grants issued by the state to residential care facility (RCF) residents receiving personal care (PC) services.

Of the \$84.4 million total cost, 65 percent paid for in-home services provided to 13,169 individuals in their homes. The remainder of the Medicaid costs funded personal care (PC) services and monthly cash grants to 6,527 residents of residential care facilities (RCF).

Nursing Facility Cost Avoidance

In fiscal year 1999, it is estimated that over \$225 million in nursing facility costs were avoided as a result of increased use of alternatives to facility-based long term care. Of the total cost avoidance, the state share was 31 percent and the federal share was 69 percent. Nursing facility cost avoidance is estimated by subtracting the actual in-home services costs for MCO clients in a home or community setting from the costs of a Medicaid nursing facility* for the same number of days.

** Total cost avoidance has been adjusted for cash grants issued by the state to residential care facility (RCF) residents receiving personal care services.

*** Totals for FY 1995 through 1999 have been adjusted for the Federal Reimbursement Allowance. In 1994 the Missouri legislature enacted the "nursing facility reimbursement allowance" program, which imposed an annual fee on all privately owned nursing facilities. The purpose of this fee was to generate additional revenue to provide for increased Medicaid reimbursement to nursing homes. (Reference RSMo 198.401-198.439.)

Over two-thirds of the nursing facility cost avoidance in fiscal year 1999 resulted from providing home care.

The remaining one-third resulted from residential care facility (RCF) residents receiving personal care and cash grants as an alternative to higher cost care settings.

Costs by Service and Funding Source

MCO home & community clients received over 5.8 million paid units of service during the fiscal year, for an annual average of 308 units per recipient. The majority of MCO participants received personal care and homemaker services.

Title XIX (Medicaid) funded over half of the MCO home care during fiscal year 1999. Title XIX funded personal care services in an RCF accounted for 18 percent of total costs. RCF cash grants (state funds only) accounted for 17 percent, and block grant and General Revenue funds for six percent of service costs. Older Americans Act Title III funds used were \$123,567.

Average Annual Cost Per Recipient

The average annual cost during fiscal year 1999 to provide in-home services to each MCO participant “medically eligible” for nursing facility level of care was estimated at \$4,179. For those who received personal care and cash grants in an RCF, the estimated annual cost per recipient was \$4,503.

For a nursing facility resident, the average annual cost was estimated at \$32,758 after adjusting for the Federal Reimbursement Allowance. The “nursing facility reimbursement allowance” program, enacted in 1994 by the Missouri legislature, imposed an annual fee on all privately owned nursing facilities. The purpose of the fee was to generate additional revenue to provide for increased Medicaid reimbursement to nursing facilities.

Nursing facility average costs were determined by dividing total expenditures by the average monthly number of recipients; it includes costs for some residents who did not have an MCO screening. Fiscal years 1995 through 1999 averages have been adjusted to exclude the Federal Reimbursement Allowance. RCF and in-home average costs were determined by dividing total expenditures by total recipients. The RCF cost includes cash grants issued by the state to residents receiving personal care services.

** FY 1995 through FY 1999 adjusted to exclude the Federal Reimbursement Allowance.

Referrals, Screenings and Outcomes

Screenings are required for persons entering nursing facilities who are Medicaid eligible or potentially Medicaid eligible. In fiscal year 1999, over 24,000 referrals were made to the Central Registry Unit (CRU). Because of an immediate need for nursing facility care, the CRU completed the screenings for 2,298 referrals; Division of Aging social workers located in county offices screened the remaining referrals.

FY 1997	21,753	3,650	18,103
FY 1998	23,970	2,746	21,224
FY 1999	24,987	2,298	21,989

Notes: The number of referrals does not necessarily correlate to the number of persons since a person can be referred more than once during a fiscal year. The decline in the number of referrals screened by the CRU from FY 1996 to FY 1997 is a result of policy changes regarding post admission screening.

In fiscal year 1999, the major sources of referrals were nursing facilities, hospitals and in-home care providers. The proportions of referrals by source have remained relatively constant the last several years.

During fiscal year 1999, half of the persons referred for screening chose or required nursing facility care. Over one-third of those referred chose home care or personal care in an RCF. Twelve percent were not authorized for a MCO qualifying service, returned to the community on their own resources, improved to where no care was needed, relocated to another state or died before a long-term care decision was made. (See Appendix, pages 18-21, for outcome information by county and region.)

FY 1999 Screening Outcomes

Referral Demographics

Age

Over half of the persons screened that chose to enter and receive personal care services in a RCF were under the age of 60. Persons who were screened and entered a nursing facility were the oldest, averaging an age of 78; almost three-fourths were 75 years of age or older. Persons screened who chose home care were an average of 72 years old, with the majority between the ages of 65 and 84.

Sex

Almost two-thirds of persons receiving a MCO screening were females. This reflects the older adult population as women are more likely than men to live longer, be widowed and need long-term care. The gap between men and women was greatest for persons choosing home care, 26% vs. 74%, and the smallest for those not receiving services, 45% vs. 55%.

FY 1999 MCO Referral Outcomes by Sex

Race

Overall, 82 percent of persons screened were reported to be white and 17 percent were black. Less than one percent were of a race other than black or white when minority status was known and reported. The percentage of black adults receiving an MCO screening was higher than that of the Missouri adult population, which is reported to be 89% white, 10% black and 1% other.
